**Digital Native**

A digital native is a person born in the age of digital technology

A digital immigrant is a person born before the age of digital technology

---

**Misconceptions**

- Digital natives automatically understand and know how to use digital technology.
- Digital natives naturally understand and can use digital technology better than digital immigrants.

---

**Truths**

- The idea that digital natives automatically understand how to use digital technology correctly is inaccurate.
- Despite digital natives knowing what digital technologies are, they do not instinctively know how to use them to the best of their ability.

---

**Example**

- A digital native may understand the general concept of Twitter. However, that does not mean they know how to use all of the tools and technological affordances of Twitter without practice or guidance from other, more experienced users.
