Have you notice baseball season is starting? What are your thoughts?

Are you more intersted in other sports? Do not have enough time? Not enough money?

I would hope that more people in our country could get into baseball than have been today. I believe one of our largest issues as a society is the lack of patience we have in all aspect of our lives. We want things right now, if not sooner. But baseball is such a long season, and the pace is so much slower, I hope more people can appreciate what the sport has to offer so that we do not lose another part of our socieity that teaches us to be a bit more patient.
