

Allowing Mixed Content in IE 8

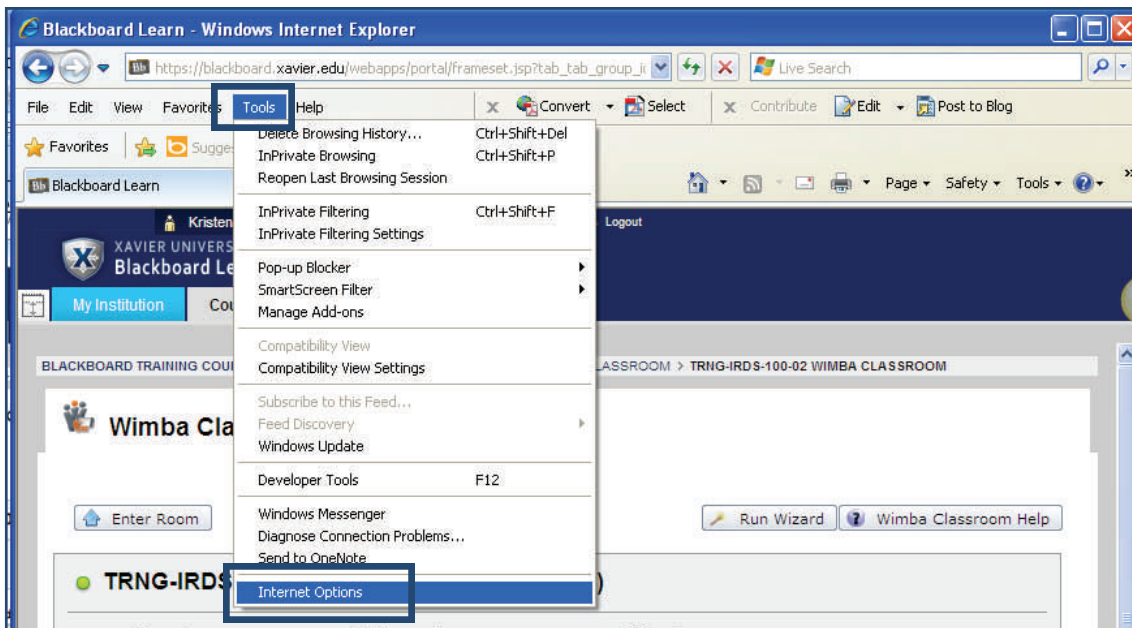

When you might need to do this:

If you're using Internet Explorer 8 to enter a Wimba Classroom or archive, clicking the **Enter Room** or **Enter Archive** button may not work and you may see the message "Error on Page" at the bottom of the window. This is due to a default security setting that you will need to change.

Changing this setting:

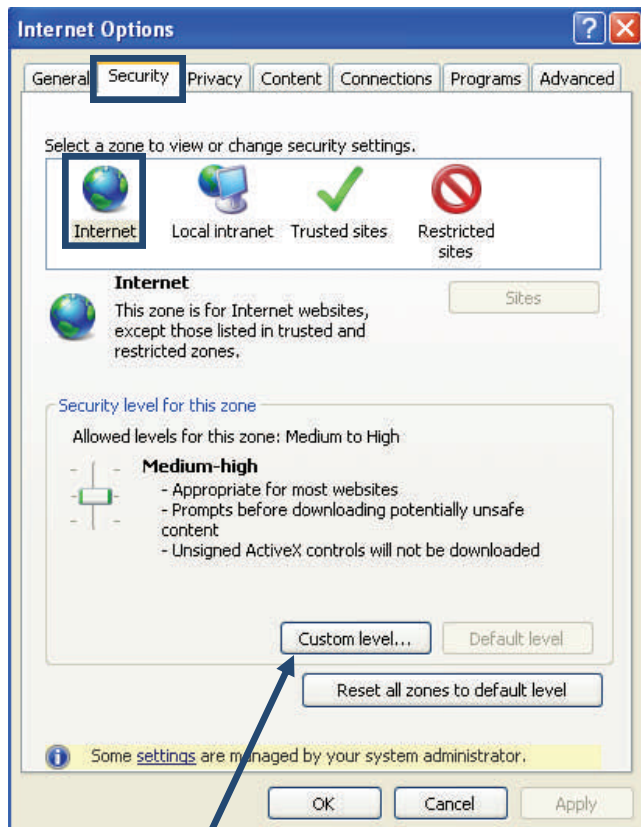

1. Click **Tools** and then **Internet Options**.

Allowing Mixed Content in IE 8

Changing this setting (cont.)

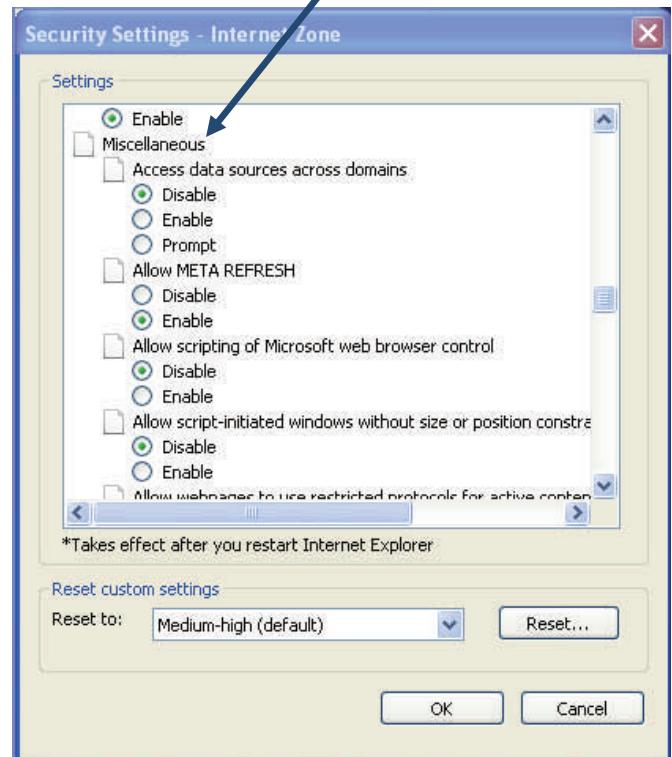

2. Click the **Security** tab.
3. Click on **Internet** if it's not already selected.

4. Click **Custom level...**

Changing this setting (cont.)

5. In the **Security Settings—Internet Zone** window, scroll down to the **Miscellaneous** section, which is about halfway down.

6. Locate **Display Mixed Content** and click the radio button next to **Enable**.

7. Click **OK**.
8. You will receive a Warning asking if you want to change the settings for this zone. Click **Yes**.
9. Click **OK** to close the **Internet Options** window.
10. You will need to close Internet Explorer and restart your computer for the change to take effect.
