CORPORATE RISK MANAGER - Consumer Products - Midwest

To apply send resume to Kim Adler at kim@corporatecollaborations.com
Compensation: Highly Competitive + Bonus

Overview
Reporting to the Director of Corporate Risk Management, the individual qualifying for the position will have responsibility for global insurance programs including oversight of related insured and self-insured claims. Operating in a team environment, the individual must possess leadership initiative, analytical skills, and have the ability to manage and coordinate internal and external relationships while facilitating multiple tasks simultaneously.

Responsibilities

Strategic Planning
• Develop and recommend strategic risk management plans.
• Research, evaluate and make recommendations to the Director of Risk Management regarding risk management, insurance and claims management programs.

Program, Processes and Procedures
• Manage all insured and self-insured casualty programs including General & Products Liability, Workers Compensation and Auto Liability. Participate in and analyze all actuarial reports for use in the self-insured casualty program.
• Participate in the Management of the company’s Captive Insurance Company.
• Develop and oversight of annual underwriting submissions for all risk transfer insurance programs.
• Participate in renewal / marketing efforts.
• Analyze cost benefit of various insurance program structures and make appropriate recommendations.
• Prepare and recommend loss and fixed cost for subsidiary allocations.
• Prepare Risk Management insurance and department expense budgets.

Communication
• Participate in the preparation of reports/presentations for senior management and operating personnel relating to risk management policies, procedures and risk financing, including Captive financial reports.
• Participate in the production of annual Executive Risk Management Reports and other pertinent documentation as required to effectively communicate with management.
• Act as corporate resource in policy and coverage interpretation for operating company personnel.
• Work effectively within internal and external brokers, insurers and third party administrators (TPA).

Safety and Loss Control
• Analyze loss experience at domestic locations, subsidiaries, and corporate level to identify trends; maintain data and communicate trends with Safety, Health & Environment personnel.
• Provide ongoing risk management support and assistance as needed to businesses, functional departments, brokers and TPA.

Claims Management
• Manage casualty (general liability, auto liability and workers compensation) and global transit losses/claims.
• Manage the third party claims risk management information system (RMIS) to identify trends to manage major losses.
• Manage US workers compensation claims, including appropriate reserving practices.
• Maintain data communication with TPA and Corporate Law Department.

**Qualifications**
• Bachelor’s degree (Risk Management, Finance or Business Administration) preferred.
• ARM designation desired.
• Depending on circumstances, more experience may be appropriate and substituted for certain educational qualifications.

**Experience**
• More than five years of progressive experience in risk management and claims management pertaining to casualty and property insurance.

**Special Skills**
• Experience with International Risk Management programs.
• Strong analytical capabilities; must be able to assemble and analyze relevant data and draw meaningful conclusions from same.
• Strong oral and written communication skills.
• Strong interpersonal skills; must be able to interface with all levels of personnel at subsidiary and corporate levels.
• Computer skills; must have an intermediate to advanced experience level using Microsoft Word, Excel, and Power Point.
