HumanaVitality Partner Health Club Network - Overview

The HumanaVitality Partner Health Club network is intended to bring value to members in two main ways:

- Discounted membership rates to make health club usage more affordable.
- Usage data reporting to allow members to earn Vitality Points™ for their workouts.

There are no fees associated with being a network partner for health clubs and there are significant opportunities for them to grow their membership base and increase engagement among members. In exchange, the clubs will offer “the lowest membership rate for the type of membership requested” together with a free introductory one-week guest pass to eligible members.

Currently, HumanaVitality receives gym usage data for members working out at most of the participating clubs on a monthly basis.

Members can find information about our partner health clubs by logging into the secured HumanaVitality website on Humana.com and going to the Partner Health Clubs page. Starting from this page, members can search for clubs located in their geographic areas, print vouchers to join a club at a discounted membership rate, and/or enroll for gym usage tracking data in order to earn Vitality Points. If none of their preferred health club are currently in the network, members can nominate a new health club to be considered by HumanaVitality for the future expansion of the Partner Health Club network.

Adding a new health club to the HumanaVitality network:

Step 1
A member submits the New Partner Health Club Nomination Request form to HumanaVitality to request a new health club to be added to the network.

Step 2
The nominations are compiled, discussed and prioritized by HumanaVitality, taking into account the number of members requesting the same health club.

Step 3
The nominated health clubs are then engaged in an assessment and negotiation process in an attempt to add the new health club to the network. Based on the club’s qualifications, responsiveness and interest in joining the network, this process is estimated to take about 6 weeks (on average). Successful partnership is not guaranteed, and significant delays may occur when criteria for health club selection are not met or when incentives are not aligned across the organizations involved.

Step 4
Upon successfully joining the HumanaVitality network, a health club will commence reporting its usage data after the 1st of the month following the enrollment.

Note: Currently, there are exceptional circumstances in which some partner health clubs may offer discounted membership but not data reporting (in this case, a member can still get rewarded by using an eligible fitness device, e.g., a pedometer, while exercising) or they may offer data reporting but not discounted membership.
