Growing Mason company offers paid fall internships for college students

Apex Supply Chain Technologies, the worldwide leader in inventory tracking and control software and point-of-use industrial vending systems, is offering several paid internships for undergraduates, graduate students, and recent graduates for fall 2012 at its Mason, Ohio world headquarters.

The 40-hour per week paid internships are:
- Web Developer Intern
- Supply Chain Intern
- Business Research/Analyst Intern

The part-time (approx. 15 hours per week) paid internship is:
- Market Research/Data Entry Intern

The company has been expanding despite the challenging economy by offering industrial vending solutions that reduce supplies and materials consumption, inventory levels, downtime, and procurement costs. Members of the Apex team have produced many innovations that have become industry standards, with new products and breakthrough technologies soon to be released.

Apex was founded in 2006, but already more than 180 Fortune 1000 companies are using Apex solutions, along with thousands of other companies throughout the world. Last year the company opened its European headquarters in the United Kingdom. This is the fourth consecutive year that Apex has offered several paid internships.

To be considered for the internships, email your resume along with introductory email or cover letter and the internship(s) you are applying for to internship@apexsupplychain.com with the subject line “Fall Intern” followed by the internship title (e.g. “Fall Intern/Supply Chain Intern”) before August 20, 2012.

For more information on Apex Supply Chain Technologies, visit www.apexsupplychain.com

The 40-hour per week internships are:

**Business & Market Research/Analyst Intern**

The Business & market Research/Analyst Intern will be principally responsible for conducting preliminary and secondary market research, performing in-depth financial modeling and analysis to assist strategic planning, developing business plans, and creating reports in alignment with the corporate business objectives. The position also requires occasional technical writing, market research, and other possible research assignments.

Qualifications:
• Academic or working knowledge of business plan development processes, market analysis, strategic planning, and financial modeling
• MBA students or other business-related fields preferred
• Strong analytical skills and business writing skills required
• Excellent organizational skills and effective communication skills
• Highly self-motivated and can-do spirit
• Attention to detail

**Web Developer Intern**
The Web Developer Intern will be responsible for creating style sheets and web pages according to existing corporate standards or from instruction of a senior member of the infrastructure team. This role is responsible for testing and fine tuning work under the instruction of senior staff. The candidates should have a good understanding of how to create consistent page templates towards a structured web development environment.

**Qualifications:**
• Major in Computer Science, Information Systems, or related fields required
• Knowledge of HTML5, CSS3 and CSS extension (SASS, LESS)
• Knowledge of Javascript, jQuery and Javascript frameworks (Backbone, NodeJS, Angular, etc.)
• Knowledge of OOP languages like Ruby on Rails, Python, or Java
• Knowledge of Relational and/or NoSQL Database Systems (MySQL, Oracle, MongoDB, Sqlite)
• Familiarity of VCS platforms (Git, SVN, CVS)
• Familiarity of Web programming IDEs (Eclipse, IntelliJ, Sublime)
• Knowledge of the major social media platforms
• Ability to work in a fast-pace working environment
• Strong collaboration and teamwork skills
• Highly self-motivated and can-do spirit

**Supply Chain Intern**
The Supply Chain Intern will be part of the Global Sourcing and Purchasing team. The primary responsibilities include understanding inventory management, developing a production schedule, analyzing markets and sourcing, and building a bill of material.

**Qualifications:**
• Major in Supply Chain Management or Business Administration
• Juniors, seniors, or graduate students preferred
• Excellent communication skills and attention to detail
• Strong analytical and problem-solving skills and self-motivation

The part-time internship is:

**Market Research/Data Entry Intern (Part-time)**
The primary duties of the Market Research/Data Entry Intern will include researching (via the Internet) new customers, writing brief descriptions of those companies, and categorizing them for various Apex customer lists in Excel and in Word, plus data entry as needed. The internship will be approximately 15 hours per week and can be tailored to work around your class schedule (please note that hours worked must fall between 8:30 a.m. and 5:30 p.m. weekdays).

**Qualifications:**
• Undergrad or grad student; ideal for Business major, but any major welcome.
• Self-motivated yet able to work as part of a talented team.
