

Programs for Catholic School Educators

Professional Development is Key to Educator Success

Affordable Options for Catholic School Educators

Education is a never ending process that doesn't stop after earning a degree or being awarded a teaching license. Continuing education can open previously closed doors that lead to additional opportunities in Catholic schools, allow you to renew your teaching license, or earn a salary increase.

Continuing education keeps you current and fresh in the classroom while allowing you to network with other Catholic school educators.

Xavier University knows that Catholic schools remain strong through highly qualified teachers with continuing education as a prime ingredient. We believe that the religious and moral formation of every child is necessary for democracy to survive. That is why we offer Catholic school teachers a significant reduction in graduate tuition.

For Current Catholic Educator
