

# DIGITAL MEDIA SERVICES

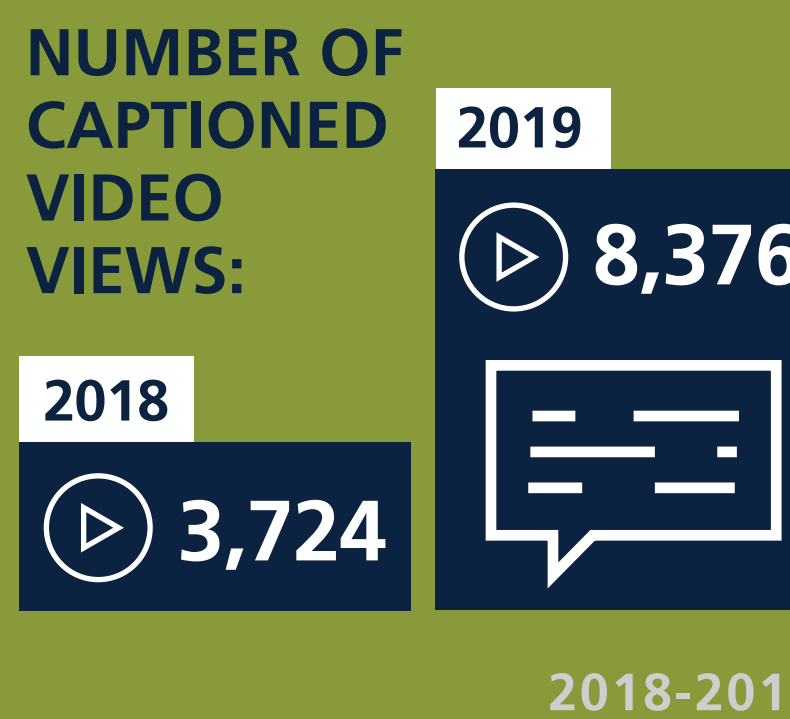

Xavier's Digital Media Services seeks to promote digital literacy through an Ignatian lens across campus, by assisting students, faculty, and staff in navigating a world of increasingly diverse, complex and interdependent media artifacts. We support users across the spectrum of digital literacy: beginning with ethical and informed use and progressing through the creative production of media for the enhancement of academic, personal, and professional communication.

Developing and sharing best practices regarding the use and creation of digital media that is effective, accessible and compliant with fair use standards
