

Inspiring Change

Despite the pressing global issues that Jim and Eileen deal with on a daily basis, they come off as an extremely happy and optimistic duo. Jim and Eileen believe that they would be considered poor in the eyes of many people, but they emphasize that they have lived extremely good lives.

They have surrounded themselves with people exhibiting similar values because they thrive off their support. In terms of social change, Jim and Eileen do not preach and argue with others to make their point. Rather, they live lives that they find fulfilling in order to influence others.
