

A Snapshot of

Haley Hercheck

Interviewee

Xavier University, Biology Major, '14

Interviewing Jim and Eileen Schenk has helped solidify my career choice following the completion of my BS in Biology from Xavier University. Previously, I had intended to pursue medical school with this degree. My experiences with Jim and Eileen have guided me into a more preventative field. I hope to attain a Masters in Public Health, which will allow me to change food policy, so that more humans can reconnect with the planet.
