

# Mobile Mammography Coming to a location near you

Screenings are provided for women 40+ and for women 35-39 who are considered high-risk or have a close family history of breast cancer. If you are under 40, please check with your insurance provider regarding coverage.

Screening mammography is recommended annually. If you are scheduling fewer than 12 months from your previous exam, it is your responsibility to confirm insurance coverage.

Financial assistance is available to those who qualify.

For a full list of community screening dates, visit [TriHealth.com/mobilemammography](https://www.trihealth.com/mobilemammography)

## Queen City Physicians University Station

1775 Lexington Ave.  
Cincinnati, OH 45212
