One tech solution for video handwriting is a USB document camera that can provide a clear and steady image for online classes. It can be used to write and illustrate complex concepts, making it easier for students to follow along. These cameras are great for teachers who want to incorporate hands-on examples into their lessons.

You can find the link to connect to the Zoom workshop at https://app.vidgrid.com/view/RfA2QiKROFQk. This will give you access to the video whiteboard workshop and other relevant resources.

Has anyone used a USB document camera before? How did it work for you? We would love to hear your feedback and experiences with this technology.
