1. PURPOSE OF THE POLICY

The purpose of this policy is to facilitate an effective and efficient utilization of University space resources resulting in a quality learning and working environment for students, faculty and staff. Through the effective management of space we will meet the University’s mission and strategic vision and achieve cost effective utilization of space. This policy also provides a framework for the regular review of the University’s space needs and use of its physical assets by a committee established to review space requests and provide recommendations, and forms a foundation for procedures to be followed in relation to the assignment of space and the relocation of units on campus.

2. APPLICABILITY

This policy applies to all building space owned or leased by Xavier University, and covers the assignment and control of such space. In each case, every consideration of the functional requirements of the occupants will be taken into account, and have a bearing on the actual allocation of space, as will the size, number, and location of any available space(s).

3. GUIDING PRINCIPLES

The following principles have been developed to clarify issues relating to the management of the University’s space.
A. All space is University Space and assignment of space is the responsibility of the University Planning and Resourcing Council (UPRC).

B. Flexibility in the joint usage of space is encouraged.

C. Academic programs and departments should be given priority in space allocation.

D. Space should be used in an efficient manner to further the mission of the University to support its learning, teaching, student enrichment, and research needs.

E. Each student and employee is entitled to an environment which meets compliance with environmental health and safety regulations.

F. The University must ensure that space is utilized using relevant standards developed by Xavier as noted in Appendix 2.

G. Allocation of space will be subject to the space meeting minimum life/safety standards for its intended purpose.

H. Allocation of space does not imply permanence. Reallocation of space may be required in response to ever changing University needs.

I. Decisions on space shall be made within the guidelines of the campus master plan.

4. SPACE MANAGEMENT GUIDELINES

A. All space at Xavier University belongs to the University. The University will allocate and reassign space to best support and further the University’s Strategic Mission and priorities. All vacated spaces will be returned to the University’s space inventory immediately upon vacating by the department.

B. If space is vacated due to the provision of newly constructed or renovated space, a department desiring to occupy and utilize the vacated space must submit the “Request for Space Form” that identifies the targeted space, and describes the programmatic justification for the projected use. See Appendix 4.

C. If a unit desires to acquire additional space, but also wants to continue to occupy its current space, it must submit a “Request for Space Form” that identifies both spaces, and describes the programmatic justification for the use of each space.

D. In the event a department is temporarily moved to allow renovation or reconstruction, it is required to return to its old space when it is suitable for occupancy and the space that it temporarily inhabited reverts back to the original occupants or is placed in the
University’s space inventory.

E. Prior occupancy of a space by an individual, department, or activity is not justification for continued occupancy of the space should the University have another use of greater priority for the space.

F. Space that has been named or identified as a result of a donor’s contribution will be maintained in accordance with the donor’s intentions.

5. DEFINITIONS

A. Allocation: The distribution of space. All usable floor space, measured in square feet of buildings.

B. Assignment: To give primary jurisdiction over use of a space to a specific department for an extended period of time.

C. Building or facility: Describes all structures and open areas on the campus or in areas under the control of the University.

D. Division Leader: Individuals holding one of the following positions: President, Provost & Chief Academic Officer, Senior Vice President and Chief Financial Officer, Vice President for University Relations, Administrative Vice President.

E. Department: Any office identified on the University’s organizational chart.

F. Relocation: The process whereby a person, department, or activity is moved from one location to another. It includes associated activities such as space reassignment if necessary, modification of space or spaces to suit the new user/use, changeover of IT and telephone, and physical movement of room contents.

G. Renovation: Physical changes to space to improve and/or modernize it, including accessibility upgrades, movement of doors or walls, the addition of technology, HVAC etc., and which may also involve changing the use or type of space.

H. Space: An area, usually defined by some form of constructed boundary, structure or building.

I. Space management inventory database: Physical Plant’s Facilities Management system, which is a comprehensive database of University space.
J. **Space reassignment**: The process whereby primary jurisdiction of space is transferred from one user to another in the University space management inventory database.

K. **Space request records**: A record of space requests maintained by the University Planning and Resourcing Committee’s Subcommittee on Space (UPRC SOS). UPRC SOS obtained from “Request for Space Forms”.

L. **Unit**: Any individual, or group of individuals, that occupies space that is owned or leased by the university.

6. **ROLES AND RESPONSIBILITIES**

The University Planning and Resourcing Committee (UPRC), University Planning and Resourcing Committee Subcommittee on Space (UPRC SOS), Senior Vice President of Financial Administration, Provost, Vice President of Facilities Management, Deans, and Physical Plant all have key roles and responsibilities in the planning, assignment, and administration of University space.

**UPRC** is responsible for final decisions related to the allocation, acquisition, and elimination of all university space.

**UPRC SOS** is responsible for communicating available space to the university community, maintaining records of requests for space, and making recommendations to the UPRC related to: 1) The future allocation/assignment of space and 2) changes to the policies governing the usage and allocation of space.

**Division Leaders** are responsible for attempting to meet the space needs of departments within their division utilizing their currently allocated space. When no space is available Division Leaders are responsible for informing the UPRC SOS of all needs for new space in their division. Division Leaders are also responsible for notifying UPRC regarding space they have vacated. Division Leaders are responsible for signing off on departmental requests for space and forwarding them to the UPRC SOS. Finally, the Division Leader is responsible for prioritizing requests when more than one department reporting to a Division submits a request for the same space from the university’s available inventory. The Chief Mission Officer, Chief Diversity and Inclusion Officer, and General Counsel will submit their request(s) to the Administrative Vice President for prioritization.

**Directors/Deans** are responsible for completing the ”Request for Space Form” in collaboration with college or departmental members requesting space and forwarding the completed ”Request for Space Form” to their Division Leader for approval.
Physical Plant is responsible for maintaining space data, floor plans, and space inventory by department for all buildings. Working in conjunction with the building coordinators, the space inventory is updated annually and vacant space is identified. Physical Plant is an available resource to use in providing planning assistance that may be needed.

Building Coordinators are responsible for maintaining records of personnel occupying offices and the use/users of all space in the buildings that they represent.

University Relations has the responsibility to reach acceptable terms of usage for named space prior to the donor’s contribution and to notify Physical Plant of any space that is to be named as a result of a donor’s contribution. University Relations is encouraged to develop terms for alternative use of restricted space prior to donor contributions when feasible and should maintain records of acceptable present and future uses of space restricted as a result of donor contributions.

7. RECOMMENDED TIMETABLE FOR SPACE REQUESTS

The UPRC SOS will inform the university community of available space twice per academic year when space is available. The announcement of space and the processing of request for space will typically adhere to the following timeline:

Announcement of available space: 3rd Monday of September and February

Deadline for request for space applications to appropriate Division Leaders: 2nd Friday of October and March

Deadline for Division Leaders to provide UPRC SOS a prioritization of competing requests for the same space in their division*: 4th Friday in October and March.

UPRC SOS recommendations due to UPRC: 3rd Friday in November and April

*When competing requests for the same available space arise from a Division the UPRC SOS will request that the Division Leader prioritize those requests consistent with the timeframe outlined above.

8. PROCESS FOR RESOLVING SPACE ISSUES

An inventory of available space will be maintained and made available to the campus community on an ongoing basis. Request for allocation of available University space will be publicized on a semi-annual basis. Requests for space that require review by the UPRC SOS are subject to the process described below.
Submission of a “Request for Space” is the official method by which a department requests space. It is required whenever a department wants to add to or exchange its current space assignment. The “Request for Space Form” is available on the Employee Hub, Nexus, under the UPRC tab. Click on Subcommittee on Space. Click on “Request for Space Form”.

When a department/division has new space needs, the Division Leader is responsible for examining all possibilities to meet this need within its existing allocation before submitting a request for additional space. Space requests not resolved internally must be approved by the Division Leaders and submitted to the UPRC SOS by the same administrators who are responsible for proposing financial requests to the UPRC, or as indicated in Section 6 - Division Leaders in this document. The UPRC SOS will review all requests it receives and make a recommendation to the UPRC for final administrative disposition.

**Requests for space will proceed through the following steps:**

Step 1: Director/Dean must complete the “Request for Space Form” in collaboration with college or department and submit to vice president or Division Leader.

Step 2: After the “Request for Space Form” has been completed and approved by the appropriate Division Leader, the completed and signed forms shall be sent to the UPRC SOS. In the event that the UPRC SOS receives more than one request for a given space from the same division, the UPRC SOS will request the Division Leader to prioritize all requests and resubmit them to the UPRC SOS.

Step 3: The completed ”Request for Space Form” will be reviewed by the UPRC SOS based on the following criteria.
  - **Optimal Utilization of Space:** An assessment as to whether existing space occupied by the requesting unit is being used efficiently will be measured using existing space inventory data and current Xavier space planning standards.
  - **Justification:** Each department or college needs to clearly explain why their program cannot be accommodated within the existing occupied space.
  - **Mission-Fit:** The space is needed for a department or college to grow in directions that are consistent with stated goals of the University and unit strategic planning.
  - **Special Needs:** A change in circumstances exist which warrants special consideration.
  - **Economic Benefit:** How the space can/will be utilized to generate revenue for the university.

Step 4: The UPRC SOS will review in a timely fashion and make a recommendation to the UPRC for the final decision.
Step 5: The UPRC SOS liaison (currently Vice President for Facilities) will notify the subcommittee and the requestor in a timely fashion of the final decision.

9. Alternative Fast Track Space Request Option

In the event that a department or division has a truly critical request for space where more timely resolution than the process outlined above is critical to university interests, the following fast track option is available.

1) During the fall and spring academic sessions, the requesting department or division can complete the Request for Space form and ask their Division Leader to have the request placed on the UPRC meeting agenda. The UPRC will assess the urgency of the request and respond in a manner it deems best which may include one of the following ways:

   - The UPRC can immediately resolve the request based on its merit on a permanent or temporary basis.
   - The UPRC can determine that time is not a critical consideration in the request for space and refer the matter to the UPRC SOS to consider with other requests at the time of the next scheduled call for space requests.

2) During the summer session, if the UPRC is not routinely convening, the requesting department or division can complete the Request for Space form and ask their Division Leader to submit it to the Senior Executive Team (SET). The SET will assess the urgency of the request and respond in one of the following ways:

   - The SET can immediately resolve the request based on its merit on a temporary basis and refer the matter to the UPRC SOS for consideration.
   - The SET can determine that time is not a critical consideration in the request for space and refer the matter to the UPRC SOS to consider with other requests at the time of the next scheduled call for space requests.

10. TYPES OF SPACE ISSUES

Space issues and requests dealing with the space changes listed below must be submitted following the process described above prior to any modification of the space.

A. Reassignment within a Department
The space resolution process must be followed when space is to be reassigned within a department in order to document the changes in space reassignment. Division Leaders have the authority to assign or reassign space under their jurisdiction. No UPRC approval is required to make this space change. Note: When space has been vacated due to the operations/department in that space being given new and adequate operational
space, or if space is vacated due to a program reduction, the space reverts to the University’s space inventory.

B. Relinquishing Space UPRC
Notify the UPRC SOS when a department wants to relinquish space. If a department has excess space in relation to the standards, the surplus space can be relinquished and reassigned if the UPRC provides final approval. The space will be recorded in the space management inventory database, as “available”. A department will be permitted to reduce that space it occupies below the minimum determined by the University’s space standards.

C. Requests for Additional Space
When additional space is needed, and departmental space is unavailable, the space request process must be followed. These requests will be reviewed by the UPRC SOS, and recommendations will be submitted to the UPRC for final approval. Resolution of additional space requests will be based on appropriate space as it becomes available.

D. Vacated Space
Vacated space is defined as space that becomes available due to lack of internal space action by the respective Division Leader. Reduction in departmental requirements, or operations relocated to new space are two examples of vacated space. Vacated space is not available for internal reassignment. The space will become part of the University space management inventory. Reassignment of the space must be requested following the space request process.

If the space vacated is located in non-university leased space or occupied under an agreement, the renewal and continuance of the lease or agreement must be recommended by the UPRC before any occupancy or new negotiations can take place.

E. Obtaining Spaces from Other Sources
The University is the only entity legally capable of entering into agreements such as purchase contracts or leases to acquire space, or to occupy space owned by others.

A. Introduction
As a part of its charge, the UPRC SOS developed **Campus Office Space Guidelines**. In recognition that space is an expensive resource to construct, alter and maintain, the UPRC SOS recommends that these guidelines be adopted by the UPRC, while keeping in mind that there will always be a need for flexibility with these guidelines. The UPRC SOS recommends that these guidelines be applied to new construction and renovation projects.

B. Space Standards
Campus Office Space Guidelines will allow for the equitable allocation and design of office space consistent with the strategies of the Master Plan. The University’s planning principles for Campus Office Space Guidelines will provide guidance in assigning office types and space allocation, and to address other considerations related to occupant comfort and productivity. Campus Office Space Guidelines will create uniformity and efficiency in the University’s work environments. The guidelines are meant to encourage designers and other stakeholders to think in terms of adaptability for future.

Square footage standards were developed through research of office environment in higher education, and a comparative review of office standards at other AJCU Institutions. In addition, the standards recommended in the 2007 Campus Master Plan, authored by the Boston firm of Shepley Bulfinch Richardson Abbot have been included. Xavier job classifications and have correlated as closely as possible to the job classifications at other AJCU institutions.

The drawings shown on the following pages are included as examples only, and are not meant to prescribe final design options. User needs must be evaluated to determine actual layouts. The options depict how the same furniture can best be configured within the same standard square footage.

C. Objectives
The guidance presented here supports the following objectives:

- To provide a quality environment for the University’s employees, thus enhancing job satisfaction among staff members.
- To foster the recruitment and retention of top-quality employees and students.
- To create functional, efficient workspaces for staff performing diverse duties in a variety of settings.
- To convey workplace equality through equitable and consistent distribution and quality of space resources throughout the University.
- To apply a consistent and professional look to office environments across the campus.
- To simplify asset management of furniture by standardizing office layouts.
D. Planning Principles

When programming new office space, designers should follow these principles:

- Employees are assigned either an open office (with moveable partitions surrounding a portion of the space) or a closed office (with fixed wall and a door). Assignment is determined by job category.
- Net assignable square footage (NASF) for each employee is determined by job category.
- Design of temporary space need not follow the guidance presented in this document. Such spaces must be designed with economy and flexibility in mind.

### REQUEST FOR SPACE FORM

#### CONTACT INFORMATION:

<table>
<thead>
<tr>
<th>Requesting Department:</th>
<th>Date:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Name:</td>
<td>Phone:</td>
</tr>
<tr>
<td></td>
<td>E-Mail:</td>
</tr>
</tbody>
</table>

Request is for: (check all that apply)

- [ ] On Campus Space
- [ ] Off Campus Space
- [ ] Swap existing space with another department/school/college/unit
- [ ] Additional space, location identified
- [ ] Additional space, location unidentified

#### I. REQUEST TO REASSIGN SPACE ACROSS COLLEGES, ACADEMIC OR ADMINISTRATIVE UNITS:

(Must have signature and approval from the Department Chair/Director, Dean/Associate Provost/Vice President/Division Leader)

Changes from:

<table>
<thead>
<tr>
<th>Bldg:</th>
<th>Room #</th>
<th>Department/Unit/Program Name:</th>
</tr>
</thead>
</table>

Changes to:

<table>
<thead>
<tr>
<th>Bldg:</th>
<th>Room #</th>
<th>Department/Unit/Program Name:</th>
</tr>
</thead>
</table>

#### II. REQUEST FOR NEW AND/OR ADDITIONAL SPACE:

(Must have signature and approval from the Department Chair/Director, Dean/Associate Provost/Vice President/Division Leader)

A. Space will be used for:  
   - [ ] Instruction  
   - [ ] Research/Grant  
   - [ ] Administration  
   - [ ] Storage  
   - [ ] Office  
   - [ ] Other

B. Space will be used by:  
   - [ ] Faculty  
   - [ ] Staff  
   - [ ] RAS/GAs  
   - [ ] Students  
   - [ ] Other (please specify)

C. What attempts have been made to resolve this issue within your current space allocation?

D. Have you identified possible space options that may be available, including shared space possibilities?  
   - [ ] Yes  
   - [ ] No

If yes, please describe and identify building/room #’s and attach drawing, floor plans that was posted on the Portal as part of the announcement of available space.
If shared space is proposed, who is the current holder and do they support the concept? (Please attach a letter of support)

<table>
<thead>
<tr>
<th>E. Date Needed</th>
<th>Length of Time Needed:</th>
</tr>
</thead>
</table>

F. Provide information on time constraints:

<table>
<thead>
<tr>
<th>G. Grant Funded?</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>Granting Agency:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Grant Dates:</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

H. Do you anticipate any existing space being vacated by your department? Yes  No

I. Briefly describe the function of your unit:

J. What type of space do you currently occupy? (Instructional, research, office, workspace, storage, etc.)

<table>
<thead>
<tr>
<th>K. Number of Full Time Equivalent (FTE):</th>
<th>Number of faculty/instructors FTE:</th>
<th>Number of part-time faculty/instructors:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of staff FTE:</td>
<td>Number of part-time staff:</td>
<td></td>
</tr>
</tbody>
</table>

Do you anticipate the number of people in your unit increasing within the next two years? Yes  No

If yes, please indicate reasons for anticipated growth:

L. Briefly describe why new or additional space is needed (i.e., value, benefits, revenue, etc):

M. Are you anticipating any remodeling or enhancements to accommodate your proposed use? Yes  No

If yes – what is the estimated cost
N. Explain how the new space will be used to support the University Strategic Plan and its conformity to the mission, learning, teaching, and research needs of the University:

O. Describe implications to your program if the space request is not approved:

**Please Note:** The authorizations below are needed for submitting your request to the UPRC Subcommittee on Space. The subcommittee reviews requests in April and October and makes recommendations to the UPRC for the final approval.

### III. REQUEST AUTHORIZATION SIGNATURES:

- **Department Chair/Director:**
