I do not have a roommate in mind and will use My College Roomie (MCR) to find a match.

1. Complete housing application
2. Complete profile in My College Roomie
3. Complete MCR roommate questionnaire
4. Search for potential matches either in the "My Matches" section
5. Send friend requests to potential matches to open lines of communication
6. Once you have found a good match, request as roommate by clicking "Request Roommate" button
7. Roommate must accept roommate request to officially be paired
8. Start to talk through different housing options and preferences; be ready with a Plan A, B, and C!

I already have a roommate in mind.

1. Complete housing application
2. Complete profile in My College Roomie
3. Complete MCR roommate questionnaire
4. Search for intended roommate by last name and make friend request
5. Talk through the differences in your roommate questionnaire to make sure this is still a good fit
6. Request as roommate by clicking "Request Roommate" button under their name in MCR
7. Roommate must accept roommate request to officially be paired
8. Start to talk through different housing options and preferences; be ready with a Plan A, B, and C!

I was not able to find any good matches through the My College Roomie system or my original match fell through.

1. You are not alone! Plenty of students prefer to "go random" or be paired with a roommate.
2. If you are a new student you will be paired with a roommate based on your questionnaire
3. Log into MCR when prompted to see your new roommate!
4. Reach out to your new roommate to start to get to know them.
5. Start talking through different housing options and preferences; be ready with a Plan A, B, and C!
