

## **SGA Meeting Minutes | 2/23/26**

### **Roll Call:**

### **Open Forum:**

Flooding issues in Kuhlman have been rampant and causing problems for students.

Physical plant dealt with a situation but could've used more Commuters are having issues dealing with the snow and bus routes have become unsafe for many. We need to make conversation into action about this safety.

### **ROA (Report of Administration): Dr. Mika Kari-Kari (Director of Res Life)**

Res Life now has a full staff which has enhanced workflow, improving student experience.

Adding the KCE Model (relationship driven model) that is implemented into residential learning. This model will lead students to connect with their RAs, communities, and building relationships that bring Xavier students closer together.

RA applications included 100+ applicants

Starting Fall 2028 3 Year Requirement begins,

The 3rd Year residency focus group has met twice and is hopeful that a community and ideas are made for the residents who will experience this.

Submit work orders to show the need for more Physical Plant members and assistance

Engagement in the halls is up there is a 40% increase of Unique Attendees

### **Questions:**

Will Brockman be reopened or what is the next year student class looking like

Brockman is set to be reopened next year if student class is big enough What is needed to get the pipes redone or replaced for student safety.

Will there be communication sent out about the update on the 3rd Year Requirement to

students. How will it be sent out?

It will be sent out in the update email all Xavier students get about what's new. This will include updates along the way, and an announcement once discussions are made.

Brockman had a fire alarm last week at 1am, why did it occur.

With the tap in restriction how are we dealing with the increasing vandalism, and is the restriction working.

Tap in Restriction: All Freshman are allowed into other Freshman dorms, All Upperclassman are allowed into Upperclassman dorms.

This has been in place since the previous administration and can cause issues with students as they cannot completely charge all the students in dorms due to this access.

Communication with Physical Plant needs to be improved especially for students affected by flooding which causes them to move but often get lost in communication.

Res Life often has to take the cost of repairing ceiling tiles which can affect the department.

Can we get an update on weather or not dorms will get cameras in the halls. It is being pushed but is expensive and can cause privacy concerns but will address and provide accountability. Opinion Entries: Metro could be used by more students how can we increase modifications.

Having

### **Scheduled Business:**

MOTION 26-14: Vote to Appoint a Communications Director Motion | Passes Unanimous

### **New Business:**

Motion 26-15 – To suspend Appendix 1 Section 8
