The Enneagram identifies 9 lenses on the world which point to core human patterns of thoughts, emotions and blind spots. In this workshop, we deepen awareness of our own Enneagram type and learn about others.

People are deeply affected as they listen to panels of people sharing their Enneagram worldview because they begin to deepen compassion for themselves and others by experiencing not only the their own inner world but also the reality of standing in someone else’s shoes. In this way, the Enneagram provides invaluable insights for those working towards a more just, more compassionate world.

Leslie Hershberger, a graduate of Xavier University’s Theology Masters program, has taught the Enneagram for over 20 years to individuals and organizations throughout the US and internationally as a tool for personal, professional and spiritual growth. She focuses on transformative practices using the 3 intelligences of head, heart and body.
