

After a short stint teaching high school math, Bob McEwan spent 34 years in engineering, manufacturing and service operations at GE Aviation's— a \$20 billion division of General Electric. Bob oversaw numerous manufacturing plants and managed thousands of employees worldwide, retiring as the General Manager of GE Aviation's global supply chain. During his career he led teams in all functions engineering, supply chain and product services. He was instrumental establishing/executing the new product introduction system, from initial design to certification to full industrialization. He had also hired, trained and mentored leaders throughout the GE family. Bob is certified in numerous GE management programs, most notably Six Sigma Black Belt and LEAN production systems. He also served as GE Eflun (Volunteer Organization) Chairperson from 1999 to 2001, leading more than 4,500 members and generating 100,000 hours of community service annually.

Since leaving GE Aviation in (2014), Bob has written Five Fundamentals to Unleash Millennial Talent, a book that focuses his leadership development theories on the Millennial generation. He is an executive-in-residence at Xavier University's Williams College of Business, serving as a guest lecturer and advisor to department deans. Bob serves as local advisor to the UC Blue Ash College board supporting the dean. Bob volunteers as the Vice President of the Alzheimer's Association of Greater Cincinnati and has chaired the ALZ WALK to END ALZ for '19 and '20 raising over \$2M.

He also keeps busy in the business world. He founded Bob McEwan Management Consulting, LLC as a vehicle to consult with companies regarding management, manufacturing and introducing new advanced technologies. And he continues to consult with GE Aviation, its partners and other aerospace companies in engineering and supply chain management.

Bob holds a bachelor's degree in mathematics from Morehead State University and master's degrees in education and business from Xavier University.
