

You've heard about AI. You've probably used AI.

**Now you can make generative AI your pedagogical partner.**

# Make AI Your Superpower

## *Professional Development Series*

### **Generative AI for Communication**

*Save time creating newsletters, drafting emails, and more*

**November 13**

7:00-8:00PM | Teams

### **Generative AI for Planning**

*Leverage your new brain partner to plan all-star lessons and more*

**February 5**

Time TBD | Teams

### **Generative AI for Differentiation (and more!)**

*Tailor instruction to meet your students' needs—plus, open Q&A time*

**April 16**

Time TBD | Teams

## Meet the Experts

**Guy Frye** is an Innovation Specialist, LEGO® Education Teacher Trainer, and adjunct faculty member at Xavier University. He designs and delivers professional development experiences that help educators harness the power of generative AI, hands-on learning, and emerging technologies to transform teaching and learning.

With extensive experience working across K-12 and higher education, Guy is known for creating interactive, practical, and future-focused trainings that inspire educators to integrate innovation into everyday practice.

**Lauren Angelone, PhD** is an Associate Professor of Science Education and Instructional Technology and Program Director for Primary and Middle Childhood Education at Xavier University. She researches the critical use of emerging technologies in teacher education, with current work examining AI as a co-collaborator in curriculum development.

Her scholarship, recognized with the Mid-Western Educational Research Association's Distinguished Paper Award, emphasizes justice-oriented science teaching, project-based learning, and digital critical pedagogy.
